

ENVIRONMENTAL STATEMENT

TopCer creates manufactures and trades unglazed porcelain wall and floor tiles, ensuring that client's needs and expectations are satisfied, in accordance with normative and legal requirements.

The development of its activity integrates environmental concerns throughout the whole product lifecycle, namely:

- Ensuring that all raw materials used in the production process are from licensed sources
- As there are legal restrictions for the ceramic industry to incorporate recycled waste in the production process, the waste is collected and managed by a properly licensed Waste Operator.
- The adoption of environmental best practices for the continuous improvement and pollution prevention

Recognizing the importance of environmental issues, TopCer decided to implement an Environmental Management System and is expecting to be certified in late 2011.

The Management
